

affordable security

The LX100 is a keyless proximity door lock that fits standard interior doors. Simply replace your existing cylindrical style door handle with the LX100 for an economical access control system in your business or home. The locks feature stand alone operation and do not require the use of a computer or external device for programming. They are powered by standard alkaline batteries eliminating the need for wiring. The LX100 uses radio frequency technology to instantly identify proximity badges and key fobs.

LX100

PROXIMITY BADGE DOOR LOCK

Replaces Existing Door Handles

LATHEM

FEATURES

- Economical door access control for up to 120 users per lock
- User installable on most existing interior wood or metal doors

Door Requirements

- Door thickness - from 1 3/8" to 2"
- Hole cutout - standard 2 1/8"
- Backset - standard 2 3/8" or 2 5/8"
- Clear Space - see diagram to the right

Which lock do I need?

Handing for an LX100 is determined by standing on the outside facing the door. If the hinges are on the left hand side, you need a left hand LX100 (LX100-L). If the hinges are on the right hand side, you need a right hand LX100 (LX100-R). See diagram to the right
